

Stadt.Land.Inn Core Team Meeting

Thu, Feb 16

With: Dani, Nadine, Ermes, Maria, Christian

Topics Annual planning, arriving in the new year, cooperation with Dorf.Labor

Arrive

Dani and Christian are sitting in the foundry, talking online with Ermes, Nadine and Maria. The two have too much fun with the radio equipment of FRI, in Dani slumbers a future radio presenter.

Christian asks what the new year has brought: Dani a new job at the university, Nadine also a new project at work (planning sustainability events at the 2024 Capital of Culture in the Salzkammergut!), Ermes it has brought another herniated disc, Maria also got a new job, and Christian is happy about a lot of rush at the Free Radio Innviertel.

Likewise, the new year has also brought Stadt.Land.Inn: including the regulars' table format "Stadt.Land.Tisch", new people in the network, a pending update to the website and many new ideas for casual events on our part.

City.Country.Table

At the request of Lisa Doppelbauer, and other multilocals in Ried, there is now also a low-threshold offer during the week: our regulars' table, the Stadt.Land.Tisch.

The first time on February 7 there were 8 participants, the second time on March 7 there were again 8, and each time there were new participants.

We want to get even more potential out that way, according to Christian:

We put up posters in the foundry and elsewhere in Ried, with the dates. This is in progress. And we are working together with the town of Ried on the welcome folder that new residents receive from the town. It should contain, or maybe even an A4 note from us, that newcomers are welcome to contact us to get to know people.

Next city.country.table: **April 4 7 pm**

Update website

Kathi/Ritec will soon update their website again: an updated map will be added to the profiles, also to the page (places). Then there are pins there, which avoid each other, if several beinander stand.

Here you can have a look:

<https://hintereinesbaumesrin.de/menschen/>(you have to log in with your Stadt.Land.Inn profile, top right)

We could use this as a prelude to actively inviting people to create a profile again.

In addition, the members' occupation/activity appears at the front of the profiles on the "People" page. So it is also, for example, for the self-employed or people in super projects (such as Stadt.Land.Inn) again more interesting to create a profile.

Village.lab

Maria shares with us her plans in Michaelnbach, and we talk about ways we can cooperate.

- FR. 24. Feb Open Day Village.Lab, 15-19h
- March 11, sewing workshop with an AR app
- March 25, Repair Café for bicycles

Multi-local tour in Michaelnbach

We planned for **MI 17 May** a multi-local tour in Michaelnbach. (Susi, your birthday exactly!)

Maria is "tour guide" and she introduces us to the Dorf.Labor. Afterwards we go to the inn in Michaelnbach, according to Maria not so bad. Who wants can go afterwards still eg to Grieskirchen or Peuerbach together furtgehen.

Multi-location tour:

- Reed, 07 April
- Michaelnbach, May 17
- Schärding, June 30

With Ines Christian still clarifies a possible date for the next tour in Braunau. But until summer we have a lot of plans again!

Other events this year

- **Multilocal Symposium: May 10-12**

we were invited to be part of the Multilocal Symposium at the Landuni Drosendorf, part of the research project of the TU Vienna

more to come, in coordination with Sandra Schwarz, RMOÖ

- **Free Tree Open Air:**

According to Maria, there will be a request to us, whether we want to organize something on the cultural stage at the Free Tree! We came up with it at the meeting, we could play werewolf, with multilocal roles (instead of the "village slut", who can sleep with another player every night, a "multilocal"?)

Sounds like fun! On Saturday can also Maria!

- **Game nights at the foundry**

Lisa suggested that we could go there together!

The next one is coming for sure, date is not yet set for April!

- **Idea: Cooperation with the Green Lama, BR, for an "underground dinner":**

a young couple from Mattighofen organizes so-called "underground dinners" as the "Green Lama The concept is, you sign up as a visitor:in and get the address data and what's for dinner only the day before the dinner.

They cook vegan, organic and regional.

An idea might be that we as Stadt.Land.Inn organize one with them. Or a mashup: city vs country → vegan vs Innviertler Knödel/Bratl etc.

Any

- Birthday calendar!

please send me your birthday data ;-)

- City district talks:

the city of Ried im Innkreis is currently doing an agenda citizen:inside participation process. Dani and Lene Schneiderbauer were there on February 15 in Ried, and there came, according to Dani, from many the need for a network we us, Stadt.Land.Inn! Good news for us!
